

TAB-micro Product Support Bulletin

Bulletin Number: DC-071107-TM
Date: 7 November 2007
Replaces: DC-061031-TM (October 2006)

SUPPORT POLICY FOR TAB-MICRO

Due to imminent component obsolescence Datapulse is formally announcing the Support Withdrawal date for TAB-micro. In order to allow our customers sufficient time to plan their telecommunications needs, the Datapulse Technical Service Centre will continue to provide technical support and assistance on TAB-micro up until 31st December 2008 (the Support Withdrawal Date).

After the support withdrawal date TAB-micro support will be withdrawn and will not be available. If individual customers have been notified of an earlier support withdrawal date for their TAB-micro system then this earlier support withdrawal date will take precedence over the Support Withdrawal Date.

Datapulse will continue to issue annual support contracts but where a 12 month contract renewal would run beyond the Support Withdrawal Date Datapulse will only charge the customer pro rata up to the Support Withdrawal Date, rather than invoice for the full 12 months.

Contracts due to renew on or after the Support Withdrawal Date will not be renewed. This is because Datapulse will not issue short term contracts when the support contract renewal date is so close to the Support Withdrawal Date.

Datapulse recognises the significant investment made by customers in purchasing their TAB-micro systems. To this effect, Datapulse will be offering an upgrade to a Precision Call Management in 2008.

PRODUCT VERSIONS SUPPORTED UP UNTIL 31 DEC 2008

Version	Launched	Comment
2.60	July 2006	Costings upgrade for updated tariffs
2.60	August 2005	Costings upgrade for updated tariffs
